Overview

Sultan Flow

Principle of Operation

The Sultan Flow measurement system operates by transmitting an ultrasonic signal from its transducer towards the liquid being monitored. The reflected signal or echo is received by the transducer and processed. The time between transmission of the ultrasonic signal and reception of the echo is measured, and using the speed of sound through air, the distance from the transducer to the liquid level is calculated. Flow through the channel or structure is then calculated from the level measurement and the user entered properties of the channel.

The Sultan Flow system uses sophisticated software to locate and track the correct echo without being affected by echos from fixed objects or changes in the liquid surface. When the liquid level or surface conditions change, the system follows preselected signal tracking parameters. In the event of a total loss of signal, the system adopts signal recovery routines to relocate the correct liquid level.

The system employs automatic gain control to compensate for changes in echo amplitude due to variations in environmental conditions. Continuous current, voltage and relay outputs are provided. These outputs can be programmed for failsafe conditions in the event of a loss of signal or system malfunction.

Certifications

- CE, ATEX, CSA (Remote Transducer)
- Conforms to British standards for flow calculations

Primary Areas of Application

- Open Channel Flow
- Water treatment
- Sewage treatment
- Irrigation
- Industrial waste water
- Power waste water
- Environmental monitoring
- Special flow requirements for unusual flow channels

Features

- Optimized frequency selections to suit the application environment
- Capable of monitoring liquid flow under the most difficult conditions
- Real time diagnostic display
- Flexible, multi point or calculated scaling of display and outputs
- Suits a broad range of flumes, weirs and flow control structures
- Programmable totalizer
- Programmable pulse per flow output
- Programmable failsafe mode
- Fast acting temperature compensation
- 3G remote setup options and configuration
- 4-20mA, HART, Modbus, Goshawk with 32 point flow table (via PC)

Typical Applications

Sultan Flow

V-Notch Sharp-Crested Weir

Rectangular Sharp-Crested Weir

Trapezoidal Sharp-Crested Weir

Rectangular Constricted Sharp-Crested Weir

Parshall Flumes

Khafagi-Venturi Flumes

Palmer-Bowles Flumes

Sewerage inlet channel with parshall flume for flow measurement

Waste water channel, with a rectangular flume for flow measurement

Irrigation channel, with a rectangular sharp crested weir for flow measurement

CA-TXCC-R-C50 50m cable

CA-TXCC-R-C100 100m cable

Specifications

Sultan Flow

Frequency

- 20kHz, 30kHz, 40kHz, 50kHz

Operating Voltage

- 12 - 30VDC (residual ripple no greater than 100mV)
- 36-60VDC
- 90 - 265VAC 50/60Hz

Power Consumption

- <3W @ 24VDC
- <6W @ 48VDC
- <10VA @ 240VAC

Analog Output

- 4 -20mA
(750 ohms @ 24Vdc User supply, 250 ohms internally driven)

Communications

- Goshawk, HART, Modbus, Profibus DP, DeviceNet
(Foundation Fieldbus & Profibus PA pending)
- Multi Drop mode can address 1-250 units over 4 wire

Relay Outputs: (5)

- Form 'C' (SPDT) contacts, rated 0.5A at 240Vac non-inductive.
- All relays have independently adjustable dead bands.
- Remote failsafe test facility for one relay.

Blanking Distance

- 50kHz = 0.25 m (10")
- 40kHz = 0.30 m (12")
- 30kHz = 0.35 m (14")
- 20kHz = 0.45 m (17")

Maximum Range

- | | | |
|---------------|-------|---------|
| • 5 m (16ft) | 50kHz | liquids |
| • 7 m (22ft) | 40kHz | liquids |
| • 10 m (33ft) | 30kHz | liquids |
| • 20 m (65ft) | 20kHz | liquids |

Resolution

- 1 mm (0.04") 50, 40, 30,20 kHz

Electronic Accuracy

- +/- 0.25% of maximum range

Operating Temperature

- Remote electronics -40°C (-40°F) to 80°C (176°F)
- Remote transducer -40°C (-40°F) to 80°C (176°F)

Transducer/Amplifier Separation

- up to 1000m (3281ft) using appropriate RS485 cable

Cable

- 4 conductor shielded twisted pair instrument cable
- Conductor size dependent on cable length.
- BELDEN 3084A, DEKORON or equivalent.
- Max: BELDEN 3084A = 500m (1640 ft)
- Max: DEKORON IED183AA002 = 350m (980 ft)

IMPORTANT
"USE SPECIFIED
CABLE ONLY"

Maximum Operating Pressure

- +/- 7.5 PSI (+/- 0.5 Bar)

Beam Angle

- | | | |
|--------|-------------------|-------------------|
| • 7.5° | without focaliser | 50kHz/40kHz/30kHz |
| • 4° | with focaliser | 50kHz/40kHz |
| • 6° | with focaliser | 30kHz/20kHz |

Display

- 2 line x 12 character alphanumeric LCD
- LED Back-lit display

Memory

- Non-Volatile (No backup battery required)
- >10 years data retention

Enclosure Sealing

- Remote Electronics IP65 (Nema 4x)
- Remote Transducer IP68

Cable Entries

- Remote: 3 x 20mm, 1 x 16mm knock outs.

Mounting

- 6" Multifit ANSI/DIN/JIS Flange

Typical Weight

Sultan AW System with appropriate flange and cone

| Frequency | (in kHz) | kg | lb |
|-----------|---------------------------------|----|-----|
| 20/30 | 20 or 30kHz (3") Transducer | 3 | 6.6 |
| 30/40/50 | 30 (2"), 40 or 50kHz Transducer | 1 | 2.2 |

Configuration kg lb

| | | | |
|-----|-------------------------------|----|------|
| R6 | Remote system with 6m cable | 1 | 2.2 |
| R15 | Remote system with 15m cable | 3 | 6.6 |
| R30 | Remote system with 30 m cable | 6 | 13.2 |
| R50 | Remote system with 50m cable | 10 | 22.0 |

HAWK, Since 1988

Hawk Measurement Systems Pty Ltd (HAWK) was established in 1988. It's founding members saw the universal requirement of various industries requiring improved process control and efficiency in their operations.

We Can Help

HAWK understands the difficulties customers face when seeking accurate level measurement. Every application is different, involving a multitude of environmental factors. This is where HAWK excels. Our aim is to ensure that customers not only feel comfortable with our technology, but also to ensure a consistent and reliable solution is in place for the long term. We believe that a combination of application and product expertise, as well as forward thinking and proactive support policies are the foundation of successful customer-supplier relationships.

Progressive Technical Support

HAWK believes that the future of the Level Measurement Industry revolves around the quality of pre and post sales - support. Our aim is for all sales & support staff to be product experts, and more importantly application experts making our customers applications as efficient and consistent as possible.

Knowledge Sharing

HAWK believes that knowledge sharing is key to creating long term relationships. Empowering our customers and our worldwide distribution network, whilst being available at all times to lend a helping hand, is the perfect recipe for long term solutions and relationships. HAWK openly extends an invitation to share our 25 plus years of level measurement experience, and ensure that your day to day processes are efficient, understood, and always working.

Additional product warranty and application guarantees upon request. Technical data subject to change without notice.
